

Specialty medication plus support just for you

Making it simpler for you

A specialty medication is used to treat complex and chronic conditions like rheumatoid arthritis, psoriasis, rare genetic disorders and cancer. Most specialty medications require prior authorization before the State Health Plan will cover them.

Personalized support to help you stay on track

The State Health Plan's participating specialty pharmacies can provide you with access to pharmacy teams that are specially trained in conditions like yours. Call the pharmacy to see how they can support you.

Find a participating specialty pharmacy and get information about costs

Register for an account at **Caremark.com**:

- Find a participating pharmacy.
- Use the Check Drug Cost and Coverage tool to find the cost of your medication.

Convenient delivery

Select participating specialty pharmacies can deliver your medication anywhere nationwide, even if you're on vacation. You can also pick it up at certain participating retail pharmacy locations.* Call the pharmacy to see what options are available.
